

Veterinary Endodontic and Crown Prep Practice Models

Replicas of canine molar. Endo models have root canals and pulp for simulation of root canal procedures. Allows for drilling with high speed dental burs, cleaning, shaping and canal obturation. Can be used with dental x-ray systems to determine apex, size and depth of canal. Clear version to see canals and results. Crown preparation version contains no canals. All versions come with handles.

- 3203. Crown Prep.....\$11.95

Feline Elbow/Shoulder Model

Features:

- Scapula
- Humerus
- Radius
- Ulna
- 9 important tendons and ligaments
- Model size 7 3/4" x 4" x 7/8"
- White plastic 6-1/2" x 5" base
- Descriptive card

Demonstrates:

- Average size feline shoulder and elbow
- Normal bone and osteoarthritic changes to joints

4021.....\$68.95

Canine Heart/Lung Model

Average Canine lungs and heart infested with heartworms. Cut away view demonstrates the right ventricle, pulmonary trunk and pulmonary arteries. Model size is 3 3/4" x 2 3/4" x 2 1/2".

4017.....\$74.95

Feline Heart/Lung Model

Average Feline lungs and heart infested with heartworms. Cut away view demonstrates the right ventricle, pulmonary trunk and pulmonary arteries. Cut section of the lung indicates heartworm induced irritation. Model size is 3 3/4" x 2 3/4" x 2 1/2".

Ear Model

Features:

- Cutaway shows canine ear canal, tympanic membrane, ossicles, semicircular canals, cochlea, bulla, eustachian tube, parotid & mandibular salivary glands, temporal muscle, cerebrum & cerebellum.
- Ear canal shows wax, inflammation, infection, fox tail & polyp.
- Ear flap (pinna) shows hematoma (cut away), inflammation, fly strike & auricular cartilage.
- Size: H 7" x W 4" x D 2 1/2".
- Hand painted in color, plus colored explanatory chart.

441. Ear model (canine).....\$69.95

Feline Pelvis/Hip Model

Features:

- Femur
- Vertebrae L6, L7
- Caudal (tail)
- Spinal cord
- Burn spurs (Osteophytes)
- Model size 7" x 4 1/2" x 2 1/2"
- White plastic 6-1/2" x 5" base
- Descriptive card

Demonstrates:

- Average size feline pelvis
- Degenerative Osteoarthritis

**OSTEO-MODEL™ CANINE SKELETON**

An excellent reproduction of a complete canine skeleton and is the most functional and flexible dog skeleton available. Every bone structure is individually hand cast and meticulously assembled to create a model that is unsurpassed in quality and detail. The limbs are completely articulated and can be placed in any natural position.

All metacarpus, metatarsus, phalanges manus and phalanges pedis may be fully manipulated. The spinal column includes intervertebral discs and is flexible from the atlas to the last caudal bone. The mandible articulates with the skull and is removable. Model measures approximately 26" in length with neck fully extended and 12" at the top of the shoulder. Easily removable from wooden base for hands on demonstration.

**Pointed Elevators helpful with large tip roots**

Standard Handle 4" with 6" overall length

-  EX14 Surgical Elevator (Equivalent Howard #1) 2 mm .....\$37.95
-  301MX Small Spade Shape Elevator 3mm.....\$37.95
-  302MX Small Spade Shape Elevator w/inside curve 3mm.....\$37.95
-  303MX Small Spade Shape Elevator w/outside curve 3mm.....\$37.95
-  301W Small Chisel Edge Elevator 3mm.....\$37.95
-  301WS Small Back Bend Elevator 3mm.....\$37.95

- Beaks close at a right-angle to the handle.
- Small beak tips with concave groove, closes completely.
- Excellent for small incisors and caudal teeth.
- Length approximately 4 1/2".

980. Extraction forceps, small (C3) (satin finish).....\$25.95

- Beaks close at a right-angle to the handle.
- Large beak tips, with double concave groove, close to approximately 2mm.
- Excellent for caudal teeth, and grasping furcation area of double-rooted teeth.
- Length approximately 4".

981. Extraction forceps, small (C4) (satin finish).....\$25.95

**Splash Impression Putty**

General purpose vinyl polysiloxane impression putty. Easy mix base & catalyst. Final cure eliminates rebound. 489. 500 ml set.....\$112.95

**Splash Impression Material**

VPS impression material is available in a convenient 1:1 automix cartridge delivery system. Cartridges are 48 ml each and come with 2 cartridges in a package with blue mixing tips. Medium body regular set for accurate impressions of teeth. Can be used with vinyl polysiloxane putty.

484 2x48ml cartridges and 6 tips .....\$47.50

**Protemp 3 Add-On Refills:**

3803. 2g A2 Shade .....\$49.95

**Revive-a-Pet**

Perfect for emergency response situations. Carrying case kit contains Hope®5 resuscitator, animal mask kit, oxygen supply tubing and physiological parameter list. For animals under 66lbs.

3085. Small.....\$259.95

Silver Recovery X-Ray Fixer Machine

Eliminates expensive and forever increasing hazardous waste removal costs. X-ray fixer CANNOT be poured down the sink or drain under any circumstances. The cost savings for small or large practices can amount to 75% over hazardous waste haulers. The system improves infection control and liability and makes an important environmental contribution. The system takes up very little space. Weighs 33lbs and compact enough to fit under x-ray processor counter measuring 13" wide, 24" deep and 20" high. Can be purchased or leased to own.

3511.....\$850.00

On-Site Medical Waste Machine

Logical alternative to expensive and forever increasing medical waste removal costs. The system cuts costs by up to 90%, replacing haulers and mail away services. Medical waste is destroyed instantly for improved infection control and reduced liability. Converts regulated waste (sharps, etc.) to non-regulated waste that can disposed of with ordinary trash. The end product is reduced in size by 75%. An inexpensive plastic disc acts as an indicator to show that sterilization has taken place. The system has been highlighted in most professional veterinary magazines, takes up very little space and can purchased or leased to own. Weighs only 12 lbs and measures 20" tall, 12" wide and 12" deep. Plastic discs are required and ordered seperately. Case of 60 is approximately a 1 year supply for a 2 Dr. practice.

3510.....\$1395.00

NatureCare Green X-Ray Solutions

Concentrated photographic developer free of Hydroquinone, Glutaraldehyde and Borat with low sulphur dioxide emission. The solution is largely water and contains no major environmental pollutants. Heavy dilution with water will reduce the COD and moderate the pH to the extent it can be discharged to sewer and meet any likely trade effluent consent. Healthier, safer, cleaner chemistry, and easy to dispose of.

- Low sulphur dioxide emission
- Clean Chemistry - Virtually no silver deposits to dirty the rollers and tank wall
- Easy disposal of spent chemistry (silver trap required)
- Guaranteed to work with all major film, processors and tanks
- Low oxidising formula lasts longer in your developer
- Concentrate (Lower Carbon Footprint) 1L dilutes with 4L of water for 5L of working solution

3044. 1 Ltr each fixer and developer .....\$79.95

Isolyser®/SMS® Onsite Sharps Treatment & Disposal

A time & money saving way of managing sharps waste. Destroys biohazardous sharps and eliminates expensive and inconvenient waste collection services. Encapsulates waste by generating heat when the catalyst is added to the odor-free base ingredient. Once cured, the waste is solidified and rendered unrecognizable and unusable; making it safe to dispose of in your regular trash. Comes with a 'built in' needle remover, the safest way of removing needles from syringes.

- Time saving, more convenient and 50% the cost of traditional collection services.
- Avoid hiring an expensive waste hauler to dispose of your sharps.
- Reduces your liability because untreated biohazardous waste doesn't leave your practice.
- Eliminates contracts, separate invoices and unnecessary interruptions to your practice.

**GREEN CHEMISTRY™**  
For A Better Environment

All States and Canada are approved for on-site sharps disposal (SMS) except for, DE, ME, MD, NJ, NY, OR, RI, VT, and VA where the mail in product (SMSm) must be purchased. SMSm is also approved for disposal of saturated/dripping gauze or bandages in all 50 states. If neither applies, the waste is considered non-biohazardous, and can be disposed of in your regular trash.

\*\*It is the generator's/user's responsibility to follow Federal, State & Local regulations for treatment & disposal of waste. Neither the EPA, FDA or OSHA endorse specific products.

SMS2400. 3 Liter.....\$47.95

CURASORB ZN

Calcium alginate dressings with zinc that absorbs and binds exudate from wounds and creates a protective cushioning gel for moist, optimal healing environment and prevents skin maceration. Easy, painless dressing removal minimizes tissue trauma and maximizes patient comfort. Absorbs approximately 20 times dressing's weight. Box of 10 2"x 2" sterile singles in peel-back package.

3344.....\$34.50

The Petosan™ Twin-Head Dental Brush

The Petosan™ Twin-Head Dental Brush is guided by the teeth, cleaning the inside and outside surfaces at the same time at the recommended 45 degree angle. Targets the vulnerable area between teeth and gum line in one easy operation. Saves time and pets accept treatment easily increasing client compliance.

- Contains high quality Dupont Tynex Nylon filaments with the appropriate softness required for pets.
- The brushes and dental kits come in three sizes based on the pets weight. Kits contain one brush and one 2.5oz tube of poultry flavored toothpaste.
