

OraStrip[®] QuickCheck CANINE

For a Limited Time, Save 40%

OraStrip[®] QuickCheck Canine is changing the way veterinarians detect periodontal disease.

Detect active periodontal disease in just seconds.

Periodontal infection cannot always be detected by the visual clinical exam because 60% of pathology lies below the gums, out of sight. OraStrip[®] QuickCheck Canine detects the presence of periodontal disease even when there are no visible symptoms, to help you make an accurate diagnosis.

OraStrip[®] QuickCheck Canine:

- ✓ Delivers point-of-care results in just 30 seconds.
- ✓ Can be administered without anesthesia.
- ✓ Provides early detection of periodontal infection that can lead to disease progression.
- ✓ Encourages client compliance by showing objective confirmation of periodontal infection.
- ✓ Quick return on investment - recoup cost of order in just a few cleanings.
- ✓ Allows monitoring of treatment plan effectiveness and compliance.

Save 40% off the first detection and monitoring device for active periodontal disease in dogs.

You can't always see periodontal disease.

OraStrip[®] QuickCheck Canine can.

"OraStrip[®] QuickCheck Canine is a rapid, simple-to-use, surefire test that offers veterinarians the opportunity to detect changes in gingival health that can't be seen by the visual exam. No more guessing. The oral visual exam alone does not work. Period."

— Dr. Marty Becker, DVM
